

Testing Check In/Out

**An expired timer triggers an alert.
Mute or warn your contacts before
conducting a test.**

Test the SolusGuard Check-In system as often as you need. This will help you familiarize yourself with the alerting process to ensure you are comfortable using the system in case of a real emergency situation.

1. Check In/Check Out Test

- **Tap Start Check-in**
- Choose a short time length (recommend 15 minute max for testing)
- Optional: enter other details into the other fields.

- **Tap Start**
- There are two buttons below the timer. Try them out and see how the timer is affected.
- At any time before the timer expires, tap the large circle timer to end the session.

Alternate:

- Allow the Check-in timer to expire.
