

SolusGuard iOS Widgets

SolusGuard provides iOS users with the ability to start SOS alerts and manage Check-In sessions using widgets (shortcuts) from their home and/or locked screen.

Adding a Widget to Your Home Screen:

1. Go to your Home Screen page where you want to add the widget.
2. **Touch and hold** the Home Screen background until the apps begin to jiggle. A **[+]** will appear at the top of the screen.
3. **Tap** the **[+]** at the top of the screen to open the widget gallery.
4. Scroll or search to find SolusGuard.
5. **Tap SolusGuard** and then choose **Check In** or **SOS** as well as the size you want. **Tap Add Widget**.
6. While the apps are still jiggling, move the widget where you want it on the screen, then **Tap Done**.

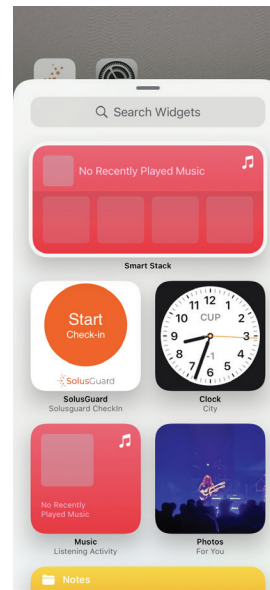

The widget will now be on your Home Screen, and can be moved by pressing, holding and dragging.

Adding a Widget to Your Locked Screen:

1. **Unlock** your cell phone and from the home page, **swipe from left to right** to bring up your “Today’s View”.
2. **Tap Edit**, or **Touch and hold** anywhere on the “Today’s View” screen until the apps begin to jiggle. A **[+]** symbol will appear at the top of the screen.
3. **Tap** the **[+]** at the top of the screen to open the widget gallery.
4. Scroll or search to find SolusGuard.
5. **Tap SolusGuard** and then choose **Check In** or **SOS** as well as the size you want. **Tap Add Widget**.
6. While the apps are still jiggling, move the widget where you want it on the screen, then **Tap Done**.

This widget can now be accessed from your lock screen by swiping left to right to view the “Today’s View” screen. It can be moved by pressing, holding and dragging.
